

GERSHOM CHARIG

PRODUCT DESIGNER

ABOUT ME

I am a product designer with 10+ years of experience in creating digital products and brand identities, currently based in London. During the last 6 years I have been responsible for the user experience and artistic direction of several fintech companies.

I specialize in the design of financial products and services, both B2C and B2B.

My passion for customer-centered design and my commitment to producing high quality work has led me to become a strategic business figure in the companies I have worked with. As a key player for product development, my experience has helped these companies achieve record-breaking results and get multi-million funding rounds.
